6-STEP EASY GUIDE

Curious Ape Mushrooms

1

PASTEURISE

Add Mulch, H₂O & Hydrated Lime to a 50L Tub
Ratio = 3g Lime: 1L Water
Soak for 12-24 hours

2

DRY MULCH

Drain excess water from straw for 1-2 hours on a table, shelf or fly screen

3

DRILL

Drill small holes around the sides & bottom of bucket for airflow and drainage

4

LAYER

Layer mushroom spawn uniformly with the pasteurised straw substrate.

6-STEP EASY GUIDE

Curious Ape Mushrooms

5

POUR INTO TUB

Leave to colonise for 7-14 days to colonise. Pinning will occur.
Spray daily

WANT MORE FRUITS?

Perform A Flush!

Once you've collected your first harvest, submerge the colonised block underwater for 10hrs or overnight to restart the fruiting process.

*You can
flush 2-4
times!*
